Course Information

Course Title: Construction Accounting #368117

Number of continuing education credit hours recommended for this course:

In accordance with the standards of the National Registry of CPE Sponsors CPE credits have been granted based on a 50-minute hour.

CPA: 10 (All states)

National Registry of CPE Sponsors ID Number: 107615.

Sponsor numbers for states requiring sponsor registration

Florida Division of Certified Public Accountancy: 4761 (Ethics #11467)

Hawaii Board of Accountancy: 14003

New York State Board of Accountancy: 002146

Ohio State Board of Accountancy: M0021

Texas State Board of Accountancy: 009349

Course Description

This course addresses every aspect of the accounting for a construction business. The intent is to not only explain accounting concepts, but also provide examples and show how an accounting system can be constructed and operated. The course pays particular attention to unique aspects of construction accounting that are not encountered in other industries, including the job cost ledger, change orders, back charges, percentage of completion calculations, and the treatment of anticipated losses on contracts.

Program Delivery Method: NASBA QAS Self-Study (interactive)

Subject Codes/Field of Study

NASBA (CPA): Accounting

Course Level, Prerequisites, and Advance Preparation Requirements

Program level: Overview

Prerequisites: Basic familiarity with accounting practices.

Advance Preparation: None

Course Content

Publication/Revision date: 11/1/2016.

Author: Steven M. Bragg, CPA.

Final exam (online): Fifty Questions (multiple-choice).

Instructions for taking this course

You must complete this course within one year of the date of purchase (if you do not complete the course within one year, contact us to determine whether an updated edition of the course is available, in which case we will provide you with a PDF of the updated course and the online exam at no charge).

A passing grade of at least 70% is required on the final exam for this course. You may retake the exam if you do not pass it on the first attempt (no charge).

Complete the course by following the learning objectives listed on the following page, studying the text, and studying the review questions at the end of each major section (or at the end of the course). Once you have completed studying the course and you are confident that the learning objectives have been met, answer the final exam questions (online).

Instructions for Taking the Final Exam Online

- Login to your account online at www.bhfe.com.
- Go to "My Account" and view your course.
- Select "Take Exam" for this course and follow instructions.

Additional Information

- The exam may be started, stopped, then resumed at a later date.
- The exam is "open book," it is not timed, and it may be retaken if not passed on the first attempt (no charge).
- Results (correct, incorrect answers) and certificate appear immediately upon passing the exam.

Have a question? Call us at 800-588-7039 or email us at contact@bhfe.com.

Learning Objectives

- Recognize the types of bonds that a contractor may be required to post.
- Cite the different types of clauses that may be added to a construction contract.
- Note the various causes of contract claims.
- Note the types of financial difficulties to which the construction industry is subjected.
- Identify the different types of ledgers used by a construction company.
- Note the components of a work breakdown structure.
- Recognize the types of accounts most likely to be designated as control accounts by a contractor.
- Recognize the different methods used to calculate the percentage of completion.
- Identify the situations in which the completed contract method should be used.
- Describe the circumstances under which the recovery of funds from a change order is probable.
- Note the proper accounting for pre-contract costs.
- Describe the normal account balances for the various account types.
- Recognize when the straight-line rent concept should be applied.
- Recognize the uses to which the accounting equation is put.
- Identify the linkage between the balance sheet and the income statement.
- Identify the impact of a long operating cycle.
- Cite the circumstances under which the useful life concept is employed.
- Note the significance of the mid-month convention.
- Identify the depreciation calculations for all depreciation methods.
- Recognize the accounting for the disposition of a fixed asset.
- Note the methods available for giving meaning to a supplier identification number.
- Recognize the purpose of the different copies of the Form 1099-MISC.
- Note the purpose of the more important boxes listed on the Form 1099-MISC.
- Recognize the reasons for loan balance differences in the records of the lender and borrower.
- Cite the rule used for determining the amount of a loss contingency accrual.
- Note the proper disclosure for the different types of contingent losses.
- Note the uses for the lessee of a lease arrangement.
- Recognize the lease rules related to short-term lease arrangements.
- Describe the usage of the Form W-4.
- Identify the calculation used for the hourly rate plan.
- Note how the wage bracket method is used.
- Recognize the payment schedules for the different types of tax deposits.
- Identify the tax calculation for the FUTA tax.
- Recognize how the equity method is calculated.
- Note the IRS designation for a multi-year contract.
- Recognize the circumstances under which the IRS allows the cash method to be used.
- Define the circumstances under which the IRS allows a business to be classified as a small contractor.
- Identify the situations in which a change log can be most profitably used.
- Recognize the controls that apply to fixed fee and cost plus contracts.
- Cite the components of earned value management.
- Describe the calculation of the cost performance index.
- Note the advantages and disadvantages of the various types of organizational structures, as well as the requirements for the formation of each one.

Preface

Construction accounting applies to a large part of the economy, since it includes *any* type of construction, such as homes, office buildings, highways, pipelines, and power plants. There are a number of unique aspects to construction accounting that are not encountered in other industries, such as the accumulation of information by job, recognizing revenues and costs based on the percentage of completion (or other methods), and the treatment of change orders and claims. In *Construction Accounting*, we address every aspect of the accounting that one might encounter in a construction business. The intent is to not only explain accounting concepts, but also provide examples and show how an accounting system can be constructed and operated.

The book is divided into three sections. In Chapters 1 through 5, we cover the essential building blocks of construction accounting, including the chart of accounts, cost codes, the job cost and equipment ledgers, and the resulting financial statements. In Chapters 6 through 12, we address the specific accounting for a number of functional areas, including fixed assets, payables, debt, leases, and payroll. In Chapters 13 through 16, we address several related topics that are crucial to the operation of a construction business, including tax issues, controls, the analysis of specific jobs, and the alternative legal structures that can be used.

You can find the answers to many questions about construction accounting in the following chapters, including:

- What cost codes are used in a construction accounting system?
- How does a job cost ledger support a construction accounting system?
- When should the percentage of completion method be used?
- Which journal entries impact the job cost ledger?
- Which unique line items applicable to construction appear in the financial statements?
- What is the accounting for construction fixed assets?
- How does one account for an investment in a construction joint venture?
- Which tax issues are most applicable to contractors?
- Which analysis reports can be created to examine the performance of a job?

Construction Accounting is designed for the accountant who wants to set up and operate an accounting system that is specific to the needs of a contractor or similar enterprise.
